Professional Summary

MCA graduate skilled in Python, Machine Learning, NLP, and computer vision using scikit-learn and OpenCV. Experienced in developing AI-driven solutions to solve real-world problems. Familiar with prompt engineering concepts and exploring LLMs and RAG.

Professional Experience

Software Engineer Intern

Ganglia Technologies Private Limited , Manipal , Udupi 576101.

June 2024 - May 2025

- Worked on Flutter, React, and WordPress for mobile and web development; led frontend efforts across projects.
- Contributed to Python-based analytics and ML projects, focusing on data processing and model implementation.

Skills

Programming Language : Python , Java , C++ , Dart

Version Control : Git , Github

Database : SQL [MySql] ,Google Firebase , Mongo DB

ML / DL / NLP : Pandas , Numpy , Scikit-Learn , Matplotlib , Seaborn ,Open CV , Web Scraping , PyMongo , Fast API , Streamlit ,

Education

Manipal Institute of Technology, Manipal , Udupi

Master of Computer Application ,CGPA : 8.03

August 2023 - July 2025

Mahatma Gandhi Memorial College, Udupi .

Bachelor of Computer Application ,CGPA : 9.02

August 2020 - July 2023

Project

1.InsightFlow

- A lightweight, modular Streamlit app for data exploration, visualization, and basic ML. Users can upload datasets, explore and describe them, create interactive charts with downloadable images, and run simple ML models with automatic encoding of categorical features.
- Ideal for quick data analysis, prototyping, or small ML experiments.
- **Tech:** Python , Pandas , Numpy , Fast API , , Mongo DB ,Matplotlib , Scikit-learn, Streamlit

2.Face recognition using Open CV

- Implemented a Face Recognition system using Python and OpenCV for detecting and identifying individuals based on facial features.
- **Tech:** Python , Open CV

3.SMS / Email Spam Classifier

- Built an SMS spam filter using NLP and ML on Google Colab with text preprocessing and model evaluation.
- **Tech:** Python, Scikit-learn, NLP, Google Colab

4.Excel Reader AI

- Developed a smart tool that leverages Gemini AI to answer relevant questions based on Excel file data, enabling instant insights without the need for complex formulas. Built using Flutter and securely hosted on Firebase for fast, user-friendly performance.
- **Tech:** Flutter , Firebase , Prompt Engineering

Certifications

- **Data Science Course** , Issued by 5 minutes Engineering
 - **Python for Data Science and AI Development**, Issued by IBM
 - **Machine Learning with Apache Spark**, Issued by IBM
 - **Generative AI : Prompt Engineering Basics**, Issued by IBM
 - **Programming with Generative AI**, Issued by IIT Guwahati
-
